

## Houston Pinch Hitter Course

The objective of this course is to introduce the non-flying member of your family to flying an airplane. We will discuss the possibility of the pilot becoming incapacitated while in flight and the need for the non-pilot to take control of the airplane. When the non-pilot is well-versed in the operation of the aircraft, it enhances safety as well as increases the enjoyment of flight. Some of the topics to be covered will include: safety, basics of aerodynamics, aircraft instruments and parts, basic navigation and chart reading, checklists, radio usage and communications, GPS usage, traffic patterns and landing, and emergency procedures.

**Directions:** Airport located on Groeschke Rd between Highway 6 and Barker Cypress, north of I-10.

### A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!
